

HOW TO PLAIT A WOGGLE

- Start with your strip of leather flat, as in Step 1, then start to plait...
- Take the right hand strand (blue) over the center strand (green) all the way to the left, then under the left strand (red) to finish as in Step 2.
- Holding the top in position, push the bottom completely up through Gap A. This will leave the strands twisted as in Step 3. This is OK.
- If you now push the bottom through Gap B, everything should come right as in Step 4.
- A bit of a twist and adjustment, and your woggle plait is complete. Add click-fasteners to the panels at each end, and you are ready to secure your scarf.
