

PRO-PLAN CHART NO. 53.

Ground to Air Emergency Signalling Code

Symbols should be at least 3 metres in height, larger if possible. The colours of the symbol material and the ground should contrast as much as possible. A space of 3 meters should separate the elements in 2, 7, 10, 14 and 17.

In addition to the symbols, make every effort to attract attention by means of radio, flares, smoke or other available means. When using smoke or fire to attract attention, use three evenly spaced fires located across the wind direction.
