

PLASTER CASTS

①

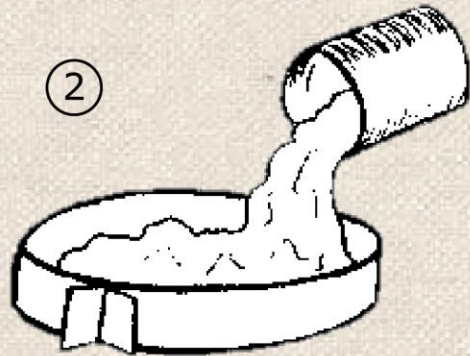

Make a cardboard collar and place around track

Detail of the join of the collar

②

Pour in the prepared plaster of paris. Pour in carefully so as not to spoil the track.

③

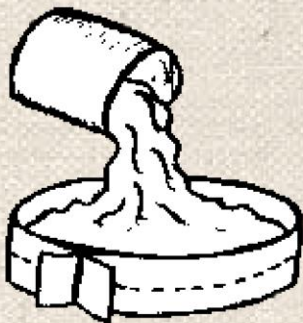

Remove mould cast and brush off dirt. Make sure the track is clean. Rub a little vaseline to stop sticking

④

Place collar around the track mould.

⑤

Pour in plaster of paris. Leave for about an hour.

⑥

Remove cast and clean rub with sand paper to remove roughness.

NOTE:

When mixing plaster stir well. Make the plaster to the same consistency as thick cream. Take care to break up lumps. Be sure to label all casts with place found, date and type.
